Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES INLAND REGION

Stanislaus River Erosion Incident, San Joaquin County

On 12/13/19 at 1503 hours, the California State Warning Center was notified by the Department of Water Resources Flood Operations Center (FOC) of significant erosion occurring on a bank on the Stanislaus River.

- No flooding is occurring and there is no emergency at this time.
- The site is on the right bank of the Stanislaus River at approximately Levee Mile 2.4.
- Reclamation District (RD) Engineers believe the damage was caused by a falling tree. The tree caused the water to swirl causing the erosion. They are concerned about other trees falling into the river and causing more issues.
- The Stanislaus River level has dropped since water release from Goodwin Dam were reduced on 12/12/19:
 - Water level decreased over the weekend, and the erosion has significantly slowed.
 - The lower water level has exposed most of the damage.
- Per Cal OES GIS:
 - Potential population impact if flooding were to occur:
 - Households: 130 (Per Reclamation District (RD) only 40-50 homes)
 - Population: 380 (Per RD only 200 people)
- The contractor began taking delivery of large rock for erosion control and has placed approximately 630 tons of rock on the eroded bank starting on the upstream end of the site.
- The FOC participated in a conference call with staff from RD 2064, Central Valley Flood Protection Board staff, DOE, and US Army Corps of Engineers to discuss removal of a large tree adjacent to the erosion site. The tree is not within the scope of the emergency work and RD 2064 and U.S. Army Corps of Engineers (USACE) are pursuing other methods to remove the tree.
- Repairs are estimated to be completed 12/23/19.

Activations

- Flood Operations Center (FOC) is activated during the week.
 - Operational Period: 0800 hours to 1700 hours, Duty Officer after hours and this weekend.

Proclamations

- On 12/12/19, RD 2064 proclaimed an emergency and submitted the Resolution to San Joaquin County OES on Friday 12/13/19.
- The San Joaquin County Director of Emergency Services will proclaim a local emergency in support of RD 2064.
 - On 12/17/19, San Joaquin County ratified its proclamation.

SITUATION SUMMARY

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

- Nothing significant to report.

FIRE ACTIVITY

Cal OES Fire Preparedness Levels

National	Northern California	Southern California
Preparedness Level 1	Preparedness Level 1	Preparedness Level 1

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- A Winter Weather Advisory remains in effect from 1000 to 2200 hours Thursday above 3,500 feet.
 - Periods of moderate snowfall continuing for elevations above 4,500 feet in the Sierra Nevada north of I-80.
 - For the Sierra Nevada along and south of I-80, snow has mainly ended.
 - Snow levels have risen above 4,500 to 5,000 feet, though some snow may still be possible in heavier showers down to 4,000 feet.
 - If travel is necessary, carry chains and expect travel delays.

SOUTHERN CALIFORNIA

- Nothing significant weather of concern.

WEATHER KEY POINTS

12/18/19 - 12/24/19

Wednesday-Thursday

- Areas of rain showers and mountain snowfall across mainly Coastal and Inland Regions today
 - Snow above about 2500 feet in Trinity County
 - Snow above about 3000-3500 feet in the western slope of the Sierra
- Moderate to heavy rainfall for just the northwest corner of the state into Thu, but no flooding expected

Friday

- Gusty winds expected to continue in northwest CA
- Dry conditions except for a chance for showers in the northern coastal areas with no significant impacts

Saturday-Tuesday

- Beneficial rain and mountain snow returns to northern CA Saturday
 - Potential for minor travel impacts.
 - Locally heavy rain is possible but exact locations uncertain at this time.
 - Minor flooding possible in northwest CA
- Rainfall chances reach the central coast and southern CA into Sunday

CALIFORNIA WEATHER IMPACTS

12/18/19 - 12/24/19

<u>Hazards / Day</u>	WED	THU	FRI	SAT	SUN	MON	TUE
Non-Thunderstorm Damaging Winds			Nrn Coastal/ Nrn Inland

WEATHER OUTLOOK

12/23/19 - 12/31/19

6-10 Day Outlook (December 23 – December 27)

Temperatures

- Below normal temperatures favored, except a slight leaning of the odds toward above normal for the lower CO River valley.

Precipitation

- Above normal precipitation favored statewide, with greatest confidence in the south.

8-14 Day Outlook (December 25 – December 31)

Temperatures

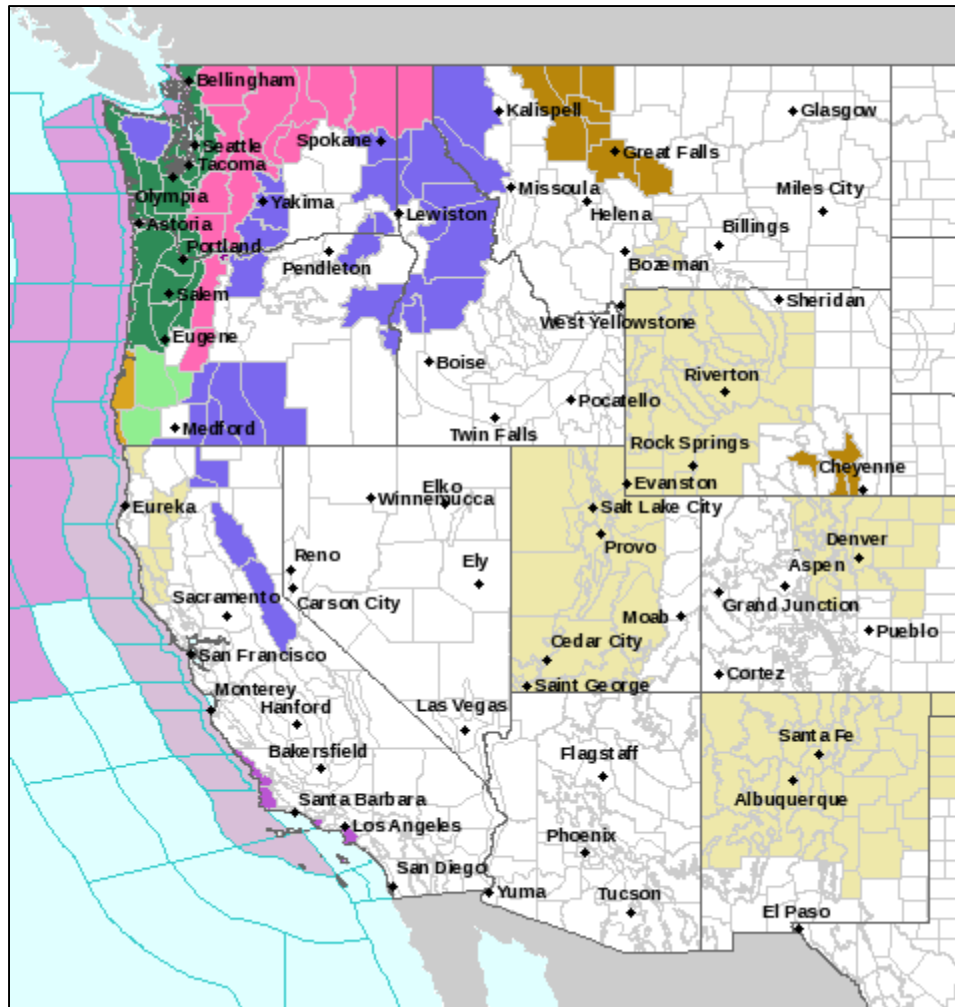

- Below normal temperatures favored statewide

Precipitation

- Above normal precipitation favored statewide especially in the Southern Region
